PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in AWS Cloud, DevOps, AI-powered applications, Developer Experience (DevEx), and workflow automation. Skilled in Python, Flutter, AWS, Docker, Terraform, CI/CD, GitHub Actions, Linux, REST APIs, and AI agent development. Experienced in building cloud-native applications, automating deployment pipelines, developing multi-agent AI systems, and delivering scalable software solutions. Passionate about cloud infrastructure, platform engineering, automation, and modern software delivery practices.

EDUCATION

B.Tech in Computer Science Engineering (Lateral Entry) 2024 – 2027

Godavari Institute of Engineering & Technology

CGPA: 8.6

Diploma in Chemical Engineering (Sandwich Program) 2020 – 2024

Government Institute of Chemical Engineering

Score: 80%

Included academic coursework and industrial training as part of the curriculum.

TECHNICAL SKILLS

- **Programming:** Python, Dart, JavaScript
- **Cloud & DevOps:** AWS EC2, VPC, IAM, S3, Route53, CloudWatch, Auto Scaling, Load Balancer, Docker, Terraform, CloudFormation, Linux
- **CI/CD & Automation:** GitHub Actions, CI/CD Pipelines, Workflow Automation, Infrastructure Automation
- **AI Engineering:** Generative AI, LangGraph, LangChain, Multi-Agent Systems, AI Agents, Prompt Engineering, Gemini API, Groq API, Ollama, Hugging Face, OCR
- **Backend:** REST APIs, FastAPI, Firebase Cloud Functions, JSON Processing
- **Mobile Development:** Flutter, Firebase Authentication, Firestore, Firebase Storage
- **Networking:** TCP/IP, DNS, DHCP, NAT, VLAN, VPN, Routing, Switching
- **Tools:** Git, GitHub, Firebase, Hive, Cloudinary

EXPERIENCE

AWS + DevOps Intern, Techwing Jan 2026 – Present

- Deployed and managed cloud infrastructure using AWS EC2, VPC, IAM, S3, Route53, and CloudWatch.
- Automated deployment workflows using GitHub Actions CI/CD pipelines, improving release consistency and reducing manual deployment effort.
- Configured VPC networking including public/private subnets, route tables, NAT Gateways, and security groups.
- Implemented Infrastructure as Code using Terraform and AWS CloudFormation.
- Worked with Docker containers and Linux environments supporting cloud-native deployments.
- Monitored system health, logs, and performance metrics using AWS CloudWatch.
- Collaborated with development teams to improve deployment reliability, engineering productivity, and operational efficiency.

PROJECTS

AI-Powered Vehicle Insurance Underwriting Assistant

[GitHub](#)

- Developed a multi-agent AI underwriting platform automating vehicle insurance processing from document upload to premium recommendation.
- Built LangGraph agents including OCR, Validation, Risk Assessment, Fraud Detection, Premium Recommendation, and Decision Agents.
- Implemented OCR pipelines using Tesseract and EasyOCR.
- Integrated FastAPI, PostgreSQL, MongoDB, Docker, and REST APIs.
- Designed explainable AI workflows with transparent decision reasoning.
- Implemented human-in-the-loop approval processes for risk-based escalation.

PocketAI – Offline AI Assistant (500+ Downloads)

[GitHub](#)

- Developed an offline AI chatbot using Ollama, llama.cpp, and Hugging Face models.
- Implemented local on-device inference without internet connectivity.
- Optimized model loading and memory utilization for mobile devices.
- Published on Google Play Store and achieved 500+ downloads.

AstarAI – AI Educational Assessment Platform

[GitHub](#)

- Developed a Flutter-based application converting PDFs and images into AI-generated MCQ assessments.
- Integrated Gemini AI, OCR, Firebase, and structured JSON workflows.
- Built scalable quiz generation and content management pipelines.

SmartMed – AI Powered Medical Learning Assistant

- Developed a Flutter-based AI learning platform for generating quizzes, flashcards, study plans, and translated educational content.
- Integrated Groq-hosted Llama 3.1 models, Google ML Kit OCR, and PDF extraction for AI-powered content generation.
- Implemented prompt engineering, structured JSON outputs, and offline storage using Hive.
- Utilized Firebase Authentication, Cloud Firestore, and REST APIs for scalable cloud-based learning services.

LEADERSHIP & VOLUNTEER EXPERIENCE

SkillUp Club – Organizer

Jan 2025 – Present

- Organized workshops on Flutter, AI, Cloud Computing, and Open Source technologies.
- Mentored students on Git, GitHub, software development, and project implementation.
- Conducted technical sessions benefiting 100+ students.

ACHIEVEMENTS

- Red Hat College Brand Ambassador.
- Published multiple applications on Google Play Store.
- Built AI-powered educational and productivity solutions used by real users.
- Achieved 500+ downloads for PocketAI.
